Suppose the birds flew to Illini Island, where the only food available is macaroni. a. Which birds would be most successful, and why? b. Which birds would be ...

## ~~Activity: Bird Beak Adaptation Lab~~

An adaptation is a characteristic that helps a plant or animal survive in its environment. Bird beaks have adapted for many things such as eating, defense, feeding young, gathering nesting materials, building nests, preening, scratching, courting and attacking. The size and shape a beak is specific for the type of food the bird gathers.
