Report discusses development and incorporation within the incremental costing model, the capability for assigning all incremental costs to the course level.

A 2020 LOCUS AWARD FINALIST Jeff VanderMeer's Dead Astronauts presents a City with no name of its own where, in the shadow of the all-powerful Company, lives human and otherwise converge in terrifying and miraculous ways. At stake: the fate of the future, the fate of Earth—all the Earths. A messianic blue fox who slips through warrens of time and space on a mysterious mission. A homeless woman haunted by a demon who finds the key to all things in a strange journal. A giant leviathan of a fish, centuries old, who hides a secret, remembering a past that may not be its own. Three ragtag rebels waging an endless war for the fate of the world against an all-powerful corporation. A raving madman who wanders the desert lost in the past, haunted by his own creation: an invisible monster whose name he has forgotten and whose purpose remains hidden.

Discusses how to set up defenses against hackers and online con artists, encryption methods, anonymizer software, spam, viruses, identity theft, firewalls, and ways to safeguard online purchases.

AMPHIBIOUS WARFARE LETTER OF PROMULGATION This curriculum guide builds upon the work of many contributors. Intellectual rigor and academic standards demand that the full scope of amphibious warfare be encompassed rather than the tracing of Marine Corps History emphasizing the landings of the Great Pacific War which had forged our modern Corps. The present course structure and content reflect the determination that (1) the history of amphibious warfare remains a valid intellectual endeavor; (2) its scope greatly exceeds the study of the U.S. Marine Corps; and (3) a historical survey of amphibious warfare is best approached from a "Maneuver Warfare" perspective, exploring the various levels of war and their impact on each battle. The levels of war would include the political, strategic, operational, and tactical/technical. This construct of classes will also prepare students to become critical thinkers of warfare, and thus better prepare them for future commissioned service to the Marine Corps. Instructors are cautioned to observe that this manual contains lesson guides, not lesson plans. Instructors must devote time for serious background reading in recommended literature, course texts, and contemplation of a conceptual approach that will capture the imagination of their students. Another important objective of this course must be to stimulate original thought and persistent interest on the part of the student. PROFESSIONAL CORE COMPETENCY OBJECTIVES The primary objectives of this course are to provide prospective merchant marine officers a basic understanding of their role in our national security and to familiarize them with the basic principles and procedures for operating a merchant ship as a naval or military auxiliary in a wartime convoy or independent sailing situation.
