The field of mechanical engineering is vast and interrelated to so many other academic disciplines like civil engineering, construction, law, and even healthcare. That is why it is imperative to create a mechanical engineering dissertation topic that is articular, sound, and actually solves a practical problem that may be rampant in the field.

We are leading the way in the synthesis and development of new composite innovations such as multifunctional materials and hierarchical composites. We have a proven track record in research and development over a huge spectrum of different composite constituents, architectures, manufacturing routes, characterisation techniques and design for final applications.
