Handbook of Commercial Policy explores three main topics that permeate the study of commercial policy. The first section presents a broad set of basic empirical facts regarding the pattern and evolution of commercial policy, with the second section investigating the crosscutting legal issues relating to the purpose and design of agreements. Final sections cover key issues of commercial policy in the modern global economy. Every chapter in the book provides coverage from the perspectives of multilateral, and where appropriate, preferential trade agreements. While most other volumes are policy-oriented, this comprehensive guide explores the ways that intellectual thinking and rigor organize research, further making frontier-level synthesis and current theoretical, and empirical, research accessible to all. Covers the research areas that are critical for understanding how the world of commercial policy has changed, especially over the last 20 years Presents the way in which research on the topic has evolved Scrutinizes the economic modeling of bargaining and legal issues Useful for examining the theory and empirics of commercial policy

Since its creation in 1884, Engineering Index has covered virtually every major engineering innovation from around the world. It serves as the historical record of virtually every major engineering innovation of the 20th century. Recent content is a vital resource for current awareness, new production information, technological forecasting and competitive intelligence. The world's most comprehensive interdisciplinary engineering database, Engineering Index contains over 10.7 million records. Each year, over 500,000 new abstracts are added from over 5,000 scholarly journals, trade magazines, and conference proceedings. Coverage spans over 175 engineering disciplines from over 80 countries. Updated weekly.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Vols. for 1887-1946 include the preprint pages of the institute's Transactions.
