"Sue Blauner's you-are-there account ... offers insight and understanding to anyone who has been touched by suicide."—Joan Anderson, author of A Year by the Sea An epidemic of international proportions, suicide has touched the lives of nearly half of all Americans, yet is rarely talked about openly. In this timely and important book, Susan Blauner breaks the silence to offer guidance and hope for those contemplating ending their lives—and for the loved ones who want to help them. A survivor of multiple suicide attempts, Blauner eloquently describes the feelings and fantasies surrounding suicide. In a direct, nonjudgmental, and loving voice, she offers affirmations and suggestions for those experiencing life-ending thoughts, and for their friends and family. Here is an essential resource destined to be the classic guide on the subject.

This is a frank, compassionate book written to those who contemplate suicide as a way out of their situations. The author issues an invitation to life, helping people accept the imperfections of their lives, and opening eyes to the possibilities of love.

A highly imaginative and relatable guide for anyone who needs the reassurance that suicide is NEVER worth it. Are you inclined to escape the crumminess of everyday life into fantasy worlds? Are you smart and imaginative in a way that isn't really suited to your surroundings? Are you definitely misunderstood, likely angry, and almost certainly depressed? Set Sykes, hailing from the UK, would prefer you stay alive and sort things out rather than the alternative, thanks. He figures there are better opportunities for you out there and lays it all out in a way that's compelling, funny, sharp, and useful. This zine turned book (please don't call it a self-help guide, asks the author) is ultimately about how to be a person in the world. It can be done non-miserably, we promise.

For much of his thirties, Jesse Bering thought he was probably going to kill himself. He was a successful psychologist and writer, with books to his name and bylines in major magazines. But none of that mattered. The impulse to take his own life remained. At times it felt all but inescapable. Bering survived. And in addition to relief, the fading of his suicidal thoughts brought curiosity. Where had they come from? Would they return? Is the suicidal impulse found in other animals? Or is our vulnerability to suicide a uniquely human evolutionary development? In Suicidal, Bering answers all these questions and more, taking us through the science and psychology of suicide, revealing its cognitive secrets and the subtle tricks our minds play on us when we're easy emotional prey. Scientific studies, personal stories, and remarkable cross-species comparisons come together to help readers critically analyze their own doomday thoughts while gaining broad insight into a problem that, tragically, will most likely touch all of us at some point in our lives. But while the subject is certainly a heavy one, Bering's touch is light. Having been through this himself, he knows that sometimes the most effective response to our darkest moments is a gentle humor, one that, while not denying the seriousness of suffering, at the same time acknowledges our complicated, flawed, and yet precious existence. Authoritative, accessible, personal, profound—there's never been a book on suicide like this. It will help you understand yourself and your loved ones, and it will change the way you think about this most vexing of human problems.

Don't Kill Me contains adventures of life-risking confrontations with animals. Stories of how the young generation, during their school and college period, take revenge on people for a very small incident and how that small incident escalates to a big-bloody episode with many losing their lives. In some instances, young people tried dangerous and life-risking activities to prove their potential. There are untold stories of birds and how they bond with human beings, how one lovely couple is being separated by society in the name of caste, how people are so cruel to animals, and how they are slowly, gradually yet prominently killing them. An account of how ancient people lived in miserable conditions - the experience of life in bullock carts and wooden boats. Stories that narrate how the bonds between people and animals are just like with our families - the tale of why crocodiles do not attack wooden boats, how houses were built and completely ruined after fires and how people came together to help one another during calamities.

The struggle with depression and anxiety affects so many of us. Being able to overcome these crippling issues is easier said than done. Surviving a traumatic experience is difficult and takes time to move on from, but this book makes the argument that with proper care and understanding, survivors can grow and reshape their lives in a positive way. For the past twenty years, pioneering psychologist Stephen Joseph has worked with survivors of trauma. His studies have yielded a startling discovery: that a wide range of traumatic events—from illness, divorce, separation, assault, and bereavement to accidents, natural disasters, and terrorism—can act as catalysts for positive change. Boldly challenging the conventional wisdom about trauma and its aftermath, Joseph demonstrates that rather than ruining one's life, a traumatic event can actually improve it. Drawing on the wisdom of ancient philosophers, the insights of evolutionary biologists, and the optimism of positive psychologists, What Doesn't Kill Us reveals how all of us can navigate change and adversity—traumatic or otherwise—to find new meaning, purpose, and direction in life.

"Kill Me is that rarest of creations—a thinking-person's thriller. In this age of the same-old same-old-fiction, White's novel stands dizzyingly above the pack. The concept is unique (and brilliant), the writing is sharp, observant, and wry (White's trademark), and every page is filled with perfectly realized human emotion—about life, death, and family. Superb."—New York Times bestselling author Jeffrey Deaver He's fabulously wealthy and lives life to the fullest-enjoying fast, expensive cars, the love of his beautiful wife, and adventures in every corner of the globe.
