Life cycles are an explicit part of the Year 3 and Year 5 science curricula and Hamilton science sessions use hands-on investigative science activities to promote a deep understanding of the relevant scientific concepts while teaching methods of scientific enquiry.. But, given the wide applicability of the conceptual learning based on the study of life cycles, Hamilton has also created a ...

Learning about Life Cycles | Hamilton Trust

Guided writing allows the teacher to work with a group of students to encourage learning the life cycles through the task of writing. Using a writing journal, the student will describe the individual stages of the animal ' s life cycle, using the vocabulary that is relevant to the animal. Some students may have difficulty with guided writing assignments, but this is where the vocabulary log, the picture glossary and other supports can assist the student in developing a deeper understanding ...
