As part of the discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. *Dual Coding With Teachers* is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35 teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

The perfect lesson planner to start your school year! A simple interior design that is free of clutter with lots of extra space to write. Full of inspirational quotes and affirmations to help motivate you through the months

Garden Myths examines over 120 horticultural urban legends. Turning wisdom on its head, Robert Pavlis dives deep into traditional garden advice and debunks the myths and misconceptions that abound. He asks critical questions and uses science-based information to understand plants and their environment. Armed with the truth, Robert then turns this knowledge into easy-to-follow advice. - Is fall the best time to clean the garden? - Do bloom boosters work?- Will citronella plants reduce mosquitoes in the garden?- Do pine needles acidify soil?- Should tomatoes be suckered?- Should trees be staked at planting time? - Can burlap keep your trees warm in winter?- Will a pebble tray increase humidity for houseplants? "Garden Myths is a must-read for anyone who wants to use environmentally sound practices. This fascinating and informative book will help you understand plants better, reduce unnecessary work, convince you to buy fewer

products and help you enjoy gardening more."

In a class of its own--an ingeniously designed teacher planner. Bring order to classroom chaos with help from The Teacher Planner. Complete with sections for important dates, a student roster, parent contact information, and weekly and monthly lesson plans, this planner has all the brilliantly designed organization you need. It's perfect for all teachers (at school and at home), and features blank grids to provide a simple, straightforward space for planning lessons for up to six core subjects. Use it year-round and over multiple semesters for the most flexible lesson planning and classroom structure. The Teacher Planner includes: The teacher's pet--Its compact design fits in your bag easily so you can take it with you anywhere. Hit the books--Made of durable materials so it lasts all year, The Teacher Planner features charmingly designed tabs and borders so you can easily find the month you're planning. Take notes--There's tons of room for jotting down important ideas, comments, and observations in addition to your lesson plans. Set yourself up for a successful school year with this smartly designed teacher planner.

Retrieval practice is a strategy in which bringing information to mind enhances and boosts learning. In this punchy and accessible book, Kate Jones gives educators strategies and tips for using this powerful technique in their classrooms.
